

The 6th International Fermi Symposium will showcase how the Fermi Gamma-ray Space Telescope continues to revolutionize our understanding of the high-energy Universe and highlight results from a variety of multi-wavelength and multi-messenger studies.

Topics include:

- Dark Matter
- The Flaring Sun
- Gamma-ray Bursts
- Blazars and Other Active Galaxies
- Gamma-ray Binaries and Novae
- Young Pulsars, MSPs and Transitional Systems
- The Fermi Bubbles and Large-scale Galactic Structure
- Supernova Remnants and Pulsar Wind Nebulae
- Cosmic-Ray Interactions and Diffuse Gamma-ray Emission
