

# GLAST Science Support Center Status Report

C. Shrader, GLAST SSC GSFC, Code 661

GLAST User's Committee, 02/04/2007 - C. Shrader GSSC, NASA/GSFC Code 661

## GSSC Staffing

- New programmer hire, March 2007
  - Actual net increase of ~0.5 FTE
  - Emphasis on science tools development
- Hope for flat staffing profile until ~mission-phase 2
- Ops SW development should ramp down over coming year
  - Could shift some ops SW manpower to analysis SW
- Real-time support staffing plan under development

#### • Work in progress:

- Implementing GUC beta-test driven changes
- New tools: pulsar blind search (partially completed)
- Exploratory work; PSF studies, LC tool

#### Proposing 2-3 F2F meetings w/LAT SW team

- Complementary to higher level WWW meetings
- Detail (nuts'n'bolts) oriented rather than brainstorming

#### Nominal Schedule

- Follow up GUC "gamma-test" by fall 07 meeting
- Full beta release in April 08
- Full release in time for support Cycle-2 NRA

GLAST User's Committee, 02/04/2007 - C. Shrader GSSC, NASA/GSFC Code 661

### User Support

- Proposal planning tools on track for 3/07 release
  - Separate presentation
- Demo available to symposium attendees
  - GLAST booth

- Completed Internal test of ToO triggering system
  - Refinements implemented
- Plans for GSSC LEO participation discussed at OPS TIM
  - Paging system being devised
  - GSSC operations support manual drafted
- Preparations for forthcoming groundsystem & end-to-end tests
  - Agreement w/ISOC's resolving ICD issues
  - Follow up discussions during symposium
  - GLAST User's Committee, 02/04/2007 C. Shrader GSSC, NASA/GSFC Code 661

## Archive & Data Operations

- Cy-1 data distribution plan under discussion:
  - GSSC will post GBM data products,
  - Possibly auxilary products, e.g. FT2 files, ExpCubes?
- Discussions this week on how/where to post LAT monitoring results. Pros/Cons:
  - GSSC: all cy-1 products in the same place, Browse compatible DB facilitates 3<sup>rd</sup> party mirrors, extensive user support experience
  - LAT: in-house expertise, reduces or eliminates "latencies", eliminates need for ICD mods, pipeline changes

### Archive & Data Operations

- Initialized procurement for DB server hardware
- ICD issues being worked w/ISOCs;
  - Discernable movement towards greater stability
- Discussions this week with ASDC:
  - Database mirror?
  - What are requirements?

#### HEASARC also reviewing ASDC system

 Will advise GSSC based on analogous experiences w/mirror sites
