Two weeks of Fermi science and analysis

Last summer...

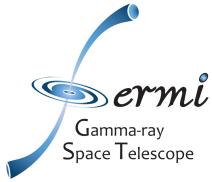

Fermi Summer School 2012
Virden Conference Center in Lewes, Delaware

<http://fermi.gsfc.nasa.gov/science/mtgs/summerschool/2012/>

Overview

- **Organized by University of Delaware, Fermi Project, Science Support Center**
 - **U Del Virden Conference facility in Lewes, DE**
- **10 days of lectures and workshop activities**
 - **Aim for ~25 students grad students and post-docs from US and non-US institutions**
- **Core instructors covering theory, modeling, instruments, and techniques**
 - **Supplemental lecturers to cover additional topics**
 - **Space and ground-based gamma rays – LAT, GBM, VERITAS, HAWC**
 - **Team and non-team scientists**
 - **Board-style lectures and hands-on activities**
 - **Students develop projects throughout the two-week period**
- **Invaluable analysis and technical support from the FSSC!**

Fermi School 2013!

- **Dates: May 28 – June 7**
- **Topics: Planning to include dark matter and searches for new physics as a special topic this year in addition to strong support for AGN, GRB, and Galactic science topics**
- **Stay tuned! Program postings and application details will be posted soon**
- **Applications due in March**
