Fermi

Gamma-ray Space Telescope

Fermi@10

Gamma-ray Space Telescope

J. McEnery

Fermi @ 10

- **Possible party in Goddard/DC area on (or near) June 11**
- **Fermi symposium in Sept/Oct 2018**
 - **Let's make it the biggest one ever!**
 - **Likely in DC area**

Fermi @ 10

- Some outreach activities
 - **Fermi Science bracket competition** for the public/community
 - Start on June 11, get to final by August 4
 - **NASA social** - This is an event that collects ~20 interested people to come and hear a sequence of short talks, which they then share via tweet and other social media, best if tied to one of the other Fermi@10 events
 - **Fermi Fridays** - a weekly Fermi social media release every Friday in 2018. We'd need to collect material to have something to say each week.
 - **Astronomy on Tap** - should arrange to have one or more astronomy on tap talks in every city that contains Fermi people.
 - **Earthday and Fermi** - perhaps arrange for a talk on TGFs
 - 10 year anniversary panel at AAS/APS meetings?
